- Kent: Drafted design for check-in/check-out system for coding project using serverless security rules. Reiterate what needs to be done for final release.
- Jonathan: Started working on presentations and report templates. Also updating JIRA stories and sprints.
- Jose: Read feedback from first presentation and started improving current slides for next week.

Current Action Items (Work In Progress)

- Esat: Coding project requires certain components to be added and working like the list view and decorate the frontend of the project looking dull right now.
- Kent: Work on presentations and report templates. Update CASE tools.
- Jonathan: Need to keep working on the project presentations as those are within the next two weeks, but also update the styling on some of the pages of our coding project. As well as continuing to work on the project reports as we need to make headway on that.
- Jose: Finish the slides for next week and make final changes in our coding project.
