# Weekly Activity and Progress Report – CS 440 Group 5 for Week 11

Group Members: Esat Duman, Kent Lizardo, Jonathan Juarez, Jose Tejeda

## Weekly In-Person Review Meeting

- When: 3/29/24 @ approx. 11:30am
- Where: Outside of Taft Hall
- Missing ( was stuck in traffic for 65 mins missing the meeting) : Esat ()
- Late ( why ) : N/A

## Recent Progress

- Esat: Spent time accessing the Google maps and got it functioning for our dashboard tab. Also put effort into customizing the google API so it aligns with our projects goals like locating quiet places on the map and additional information. Google API is also shared amongst teammates through my account to use.
- Kent: Fully implemented unification of Create-A-Space and Editing features. Implemented Space list. Update JIRA for missing stories and backlogs that were supposed to be added in previous releases.
- Jonathan: Spent time working on the styling for our coding project, particularly in the home and about pages, also spent time trying to implement individual space cards as per our second scenario but did not figure it out in time for demo. Also created and marked off stories in JIRA.
- Jose: Worked on css styling on certain pages of our coding project. Spent some time figuring out how our final product will look after our 2$^{nd}$ demo feedback.

## Current Action Items ( Work In Progress )

- Esat: Updating JIRA with stories regarding the styling of our user authentication section login/sign up. Working on the Dashboard to allow users to create a list of silent spaces and verified to be put on the map.
- Kent: Report on JIRA for more changes this weekend. Implement user following featuresprotocols via Firebase Firestore. Migrate to AdvancedMarker class implementation for more features. Add Location selection. Look into search filters and URL params
- Jonathan: Need to finish implementing the space cards, and add more description information to our project, and images where needed. Also keep updating JIRA as I go.
- Jose: Plan out how our final coding project will look and adjust for the recommended changes from the TA feedback from our second demo. Log into JIRA and add some new stories.
