Weekly Activity and Progress Report – CS 440 Group 5 for Week 7

Group Members: Esat Duman, Kent Lizardo, Jonathan Juarez, Jose Tejeda

Weekly In-Person Review Meeting

- When: 2/23/24 @ approx. 10am
- Where: Outside of Taft Hall
- Missing (why) : Esat (Doctor's Appt.)
- Late (why) : N/A

Recent Progress

- Esat: Updated the prototype from figma. Started react development for the home page. Spoke with team members on what needs to be our first priority to successfully finish tasks on time and efficiently
- Kent: Reorganization of routes and auth protection in app. Created create-a-space and find-a-space routes. Find-A-Space views dummy JSON data. Made create-a-space hook into Firebase db to make documents for each space.
- Jonathan: Spent time with Kent this week working on the space-cards for our coding project demo due this week. Also spent time with the group overall to discuss key points to touch during our demo presentation. Crossed stories off JIRA and made sure to start the next sprint.
- Jose: Worked on progressing the coding project to have a presentable demo for the TA. Got feedback for the next demo and wrote down some key points to put into the second scenario.

Current Action Items (Work In Progress)

- Esat: Finish the design and visual aspect of the project. Help backend developers on team with what needs functionality. Prepare for the next upcoming scenario and use the advice given to our team to improve our work.
- Kent: Finish find-a-space and create-a-space functionality. Get started on Space View routing. Start implementing Geocaching. Help with working on Scenario 2.
- Jonathan: Need to start working on our second scenario, we got good feedback from the TA at our demo, so I have a good idea of reasonable goals to aim for the next demo. Also need to keep practicing with NodeJS to get more comfortable with it, and start looking into accessing the google maps API.
- Jose: Use the TA feedback to improve the coding project to meet our second scenario goals in time for demo 2. Take a look at JIRA and edit stories based on our upcoming second scenario.
